

持続可能な未来へ SUSTAINABLE FUTURE

平和で持続可能なビジネスソリューションのためのAIとロボティクス
AI and Robotics for Peaceful & Sustainable Business Solutions

Africa is grappling with major social and environmental challenges, largely from economic limitations.
アフリカは大きな社会的・環境的課題に直面しており、その多くは経済的制約に起因しています。

One of the most pressing issues in major cities is **waste management**.
主要都市で最も深刻な問題の一つが廃棄物管理です。

Plastics account for about 10-20% of urban solid waste worldwide, and a significant portion ends up in rivers and oceans each year.
プラスチックは世界の都市ごみの約1~2割を占め、その一部が毎年、河川や海洋に流出しています。
